Basic Info.

Model NO.

CY-100D

Warranty

1 Year

Detection Method

Spectrophotometer

Advantage

High Sensitive

Principle

Classic Spectrometer

Wavelengths

Visible Spectrometer

Dispersive Element

Grating Spectrometer

Light Number

Monochromator

Certification

RoHS, ISO9001, CE, TUV SGS BV

Customized

Customized

DSC Range

0~±500MW

Power Requirements

Power Requirements:

Environmental Temperature

Environmental Temperature:

Relative Humidity	20-80%
Transport Package	Carton
Specification	75cm*65cm*70cm
Trademark	CYEEYO
Origin	Shan Dong
HS Code	9027500090
Production Capacity	100

Packaging & Delivery

Package Size	68.00cm * 98.00cm * 89.00cm
Package Gross Weight	68.000kg
Lead Time	15 days (1 - 1 Pieces) To be negotiated (> 1 Pieces)

Product Description

Handheld Raman Spectrometer Spectroscopy Portable

Product profile:

The CY-100D handheld pull manan spectrometer uses laser Raman spectroscopy analysis,requiring only a small number of samples for nondestructive rapid detection.The equipment adopts compact and portable design,with integrated space light path and excellent man-machine interface,small volume and light weight, suitable for flexible and fast inspection, can be directly

read
the detection report on the instrument display screen.With its leading detection performance and ease of use,it is currently a handheld substance recognition instrument with a long standby time and complete cloud platform support.

Instrumentation features:

·Quick attachment bayonet,pull probe,SIM card slot,physical keys, liquid accessories, scanning accessories;
·Replaceable battery, safe and reliable,unlimited endurance;
·Patent attachment bayonet:quick switching of multiple accessories;
·Damped probe,no cap change, the focal length is continuously adjustable;
·The cloud platform supports the cloud database,two-way encryption,security and stability;
·Support hybrid identification,can analyze 5 kinds of mixed ingredients simultaneously, calculationtime<10s, false alarm rate <3%;
·High fluorescent substance recognition,combined with high sensitive hardware,using the algorithm to extract the substance signal hidden in the fluorescence, can accurately identify heroin,ketamine,xanthan gum,cellulose and other highly fluorescent substances.

Technical parameters:
