Basic Info.

Model NO.	LR-S
Warranty	1 Year
Detection Method	Spectrophotometer
Advantage	High Sensitive
Customized	Customized
Feature	6 Wavelength Light Source Is Used
Test Item	Pesticide Residue
Test Item (2)	Non-Edible Chemicals
Test Item (3)	Physicochemical Indexes
Transport Package	Plywood Cases
Specification	40*30*18CM
Trademark	LONROY
Origin	Guangdong

HS Code

9024800000

Production Capacity

200

Product Description

LR-S Series Full Spectrum Food Safety Tester Portable Handheld Raman Spectrometer for Pharmaceutical

Product details:

1. Full spectrum detector uses a single continuous wavelength light source, equipped with 18 detection channels, high intelligence, accurate results, integrated with colloidal gold reading card module, effectively make up for the full spectrum equipment for the detection of special items, including non-edible chemical substances, additives, agricultural and veterinary drug residues and other categories, covering a wide range. Suitable for detection requirements in a variety of occasions;

2. It can be applied to food and drug regulatory departments such as public security food and drug environment case handling, market regulatory bureau, food safety testing, food and drug environment system, basic food and drug office and other food and drug regulatory departments to meet the needs of food safety rapid testing. It can be widely equipped in multiple application scenarios such as testing vehicle, testing station and basic rapid inspection office.

LR-S Series Full Spectrum Food Safety Tester Portable Handheld Raman Spectrometer for Pharmaceutical

Product advantages:

1. Use a single continuous wavelength light source to cover the commonly used detection wavelength;

2. 18-channel high-throughput detection.

LR-S Series Full Spectrum Food Safety Tester Portable Handheld Raman Spectrometer for Pharmaceutical

Detectability

Category	Item

Non-edible chemicals	Formaldehyde, borax, hanging white block, etc
Abuse of food additives	Nitrite, sulfite, sulfur dioxide, etc
Pesticide residue	Organophosphorus pesticides, carbamate lipid pesticides, etc
Physicochemical indexes	Residual chlorine, amino acid nitrogen, acid value, etc
Residue of veterinary drug	Clenbuterol hydrochloride, salbutamol, ractopamine, etc
